

IMPORTANT NOTICE

July 10, 2013

EQUIPMENT UPGRADE FOR APTN C BAND

APTN East, North and West are currently available in C band using Power Vu technology. To improve signal quality and service, APTN will be upgrading its C band signal to Motorola (ARRIS) technology as of September 17, 2013.

In preparation for this upgrade and to ensure minimal disruption to cable operators, APTN will be available in both Power Vu and Motorola (ARRIS) technology as of August 15, 2013 through to September 17, 2013 at 9:00 am EST. At that time, the Power Vu technology feed will end and APTN will be available only at the technical coordinates below using Motorola (ARRIS) technology.

Anik F1R C band Technical Coordinates (Motorola (ARRIS) Technology):

	CATV		MPEG	UCS		Satellite /		Modulation
VCT	VCN	Program	#	Group ID	Polarization	Transponder	L-Band	/ FEC
517	107	APTN-E	8	3	B (Vert) RX	F1R 6B-4	1201.5	3/4
517	109	APTN-W	10	3	B (Vert) RX	F1R 6B-4	1201.5	3/4
517	110	APTN-N	11	3	B (Vert) RX	F1R 6B-4	1201.5	3/4

Note: Symbol Rate is 14.63 Msps

We recommend the following Motorola (ARRIS) decoder model numbers however you can check with your equipment provider for further information.

DSR 4400X
DSR 4402X
DSR 4410
DSR 4500

DSR 4520X
DSR 4530
DSR 4400MD
DSR 4410MD

DSR 4440
DSR 4460

If you have any inquiries for APTN, please contact Dawn Olivence at 204-947-9331 ext. 340 or dolivence@aptn.ca.

Please note that a re-authorization from Shaw Broadcast will be required for this new location. Please call our Help Desk at 1-800-268-2943.
